

Human Factors Consultant Transportation Sector

ARCADIS is a leading international company providing services across three fully integrated business lines: Infrastructure, Environment and Buildings. We work diligently to deliver successful solutions that meet client objectives and to realise our vision to inspire extraordinary environments.

With a wealth of experience in the UK market we have the expertise and local knowledge to deliver results quickly and effectively, while ARCADIS' global reach and 'one team' approach means projects can operate seamlessly across multiple geographies. Clients value the fact that they get the reliability and scalability of a global brand with the agility and understanding of a local player.

ARCADIS Vectra is a leading supplier of specialist technical consultancy and implementation services to regulated industries and associated market sectors, primarily working for clients in the nuclear, oil, gas and process and transportation sectors enabling them to achieve their goals by developing risk management and specialised engineering processes.

Main function and scope is to contribute to the growth of design solutions and human factors capability by integrating the human element into system design and operation of a project. The human factors consultant takes ownership of client problems and develops and implements innovative added value solutions. He/she wins net orders and grows orders annually at an accelerated rate whilst ensuring the quality and consistency of service delivery.

The ideal candidate has experience in applying human factors practices to blue chip clients in the transportation sector. Relevant consultancy/commercial experience is also advantageous. He/she is a confident communicator and be able to integrate effectively into a client organisation.

Experience	Demonstrated experience of applying human factors engineering methodologies to transportation and other projects in the UK. Knowledge and experience of human factors integration and management methods would also be beneficial. The candidate should be experienced in leading on the definition of engineering and integration problems, the formulation of human factors solutions and the effective application of these within multi-disciplinary, operational domains.
Employment basis	Permanent/Full time
Education and qualifications	Degree in a relevant human factors discipline (ergonomics, psychology) Ideally the candidate will be a registered member of the Ergonomics Society of Great Britain (or equivalent body).
Job location	Flexible - a significant proportion of our transportation portfolio is based in London, although opportunities frequently arise nationally and internationally.
