

Systems Integration Manager/Consultant Transportation Sector

ARCADIS is a leading international company providing services across three fully integrated business lines: Infrastructure, Environment and Buildings. We work diligently to deliver successful solutions that meet client objectives and to realise our vision to inspire extraordinary environments.

With a wealth of experience in the UK market we have the expertise and local knowledge to deliver results quickly and effectively, while ARCADIS' global reach and 'one team' approach means projects can operate seamlessly across multiple geographies. Clients value the fact that they get the reliability and scalability of a global brand with the agility and understanding of a local player.

ARCADIS Vectra is a leading supplier of specialist technical consultancy and implementation services to regulated industries and associated market sectors, primarily working for clients in the nuclear, oil, gas and process and transportation sectors enabling them to achieve their goals by developing risk management and specialised engineering processes.

Main function and scope is to help grow our systems integration capability in our transport sector by taking ownership of client problems and develops and implements innovative added value solutions. He/she wins net orders and grows orders annually at an accelerated rate whilst ensuring the quality and consistency of service delivery to clients.

The ideal candidate will be able to demonstrate significant experience of applying systems integration methods and techniques to transportation projects in the UK. He/she is a confident communicator and is able to integrate effectively into a client organisation.

Experience	Experience will include interface management, systems integration and verification, and validation; test and commissioning as well as delivery of technical and/or safety cases. Experience with signaling systems, communications systems and/or operations and the application would also be beneficial.
Employment basis	Permanent/Full time
Education and qualifications	Degree in a relevant science or engineering discipline Ideally the candidate should be a member of a recognised engineering institute.
Job location	London
